

Repleni-Trac™ Vault

Customer testimonials

"We have been using Repleni-Trac Vault since 2018 for our drug safe and inventory monitoring and have been really impressed. I recommend anyone looking for an easy system to track who has access to the controlled drugs look at this system. Through the Repleni-Trac Vault system we know when anyone has accessed the controlled safe and what was taken. It has allowed us to be more efficient with staff utilization and workflow, while still being compliant on having controlled medications locked up securely.

Overall, the Repleni-Trac Vault system is easy to use and easy to set up. Registering employees is easy, and I don't have to change combinations for everyone if someone leaves. Using the kiosk allows us to track what has been dispensed for each patient and it sorts easily by appointment. We use Via Info systems and find the kiosk updates as close to real time as possible. Reordering from the dashboard allows items to go directly to the MWI cart, or you can order through MWI and then items show up in the dashboard.

I highly recommend anyone wanting more control for their controlled drugs to check out Repleni-Trac Vault. They have made it easy and safer."

Doctor/Owner of a pair of Companion Animal Clinics in the D/FW Metroplex

"We have been very pleased with the Repleni-Trac Vault system! Previously we were using a 2-key-lock system, which was such a hassle for the staff to have to track down the keys when needed. Beyond the hassle, us on the admin side had no way to really monitor who was accessing the box. The Repleni-Trac Vault has allowed our staff to be able to access the vault in a timely manner, while keeping detailed records of who and when accessed it.

The process of reconciling our medications has also become so much easier. We used to have to manually add up every handwritten log entry and cross reference to what was present. This keeps a log of how much should be available so we can quickly reference if we're on track or not.

Anytime there are changes in a clinic, there will be push-back from the staff. But I am pleased to say that this has been one of the easiest transitions we have done! The staff was trained quickly and have only had miniscule technical errors. I do think our entire staff has been happy we made the switch!

[The Repleni-Trac Vault team] has been a great resource to help with any questions or concerns we might have. [They have] been timely in his response and will walk me through the processes step-by-step."

Practice Manager of a large Companion Animal & Exotic Specialty and Referral hospital in Birmingham, AL

Practice Manager of a large Companion Animal Wellness Center in Tucson, AZ (survey results)

1. How satisfied are you with the ease of use of the Repleni-Trac Vault Solution?
